

Product Overview

UriniX™ is a next-generation odor defense system engineered for waterless and low-flow urinals. Unlike masking deodorizers, UriniX™ attacks odor at the source by eliminating uric acid buildup on porcelain and trap surfaces. Its eco-conscious, non-corrosive formula protects waterless urinal seals, ensuring long service life and reliable performance.

Unlike other standard-use cleaners, the UriniX™ formula does not contain the active ingredients commonly found in most cleaners and deodorizers that break down urinal sealant. Instead, UriniX™ contains an odor neutralizer that molecularly destroys malodor molecules at the chemical level.

UriniX™ is safe for use not only in urinals, but also in drains and toilets, providing a complete odor-neutralizing solution for restroom maintenance.

Key Benefits

- Eliminates Odors at the Source – Uses an odor neutralizer that molecularly destroys malodor molecules rather than masking them.
- Seal & Plumbing Safe – Formulated specifically to avoid degradation of cartridge seals and drain membranes common in waterless urinals.
- Eco-Conscious Formula – Biodegradable and VOC-compliant. Does not contribute to indoor air quality issues or environmental hazards.
- Surface Versatility – Effective on porcelain, stainless steel, ceramic, and composite urinal surfaces without etching or staining.
- Maintains Sealant Efficacy – Maintains the efficacy of sealant, supporting manufacturer sealant lifetime.

Technical Features

- Mode of Action: Odor neutralizer that molecularly destroys malodor molecules.
- Application Method: Mist using the quart bottle and trigger sprayer as part of routine maintenance or at each restroom service.
- Compatibility: Safe for use with all leading brands of waterless urinals (Falcon, Sloan, Kohler, etc.).
- pH Range: Mildly acidic to remain surface-safe while preventing uric acid buildup.
- Non-Corrosive: Verified non-reactive against common urinal seal and gasket materials (silicone, elastomer, and rubber).
- Fragrance: Light, clean scent for immediate freshness without masking odors.

Recommended Use

- Apply daily or every service cycle as part of restroom maintenance.
- Mist directly onto porcelain, stainless steel, drains, or toilet surfaces to allow UriniX™ to molecularly destroy the molecules causing malodor.

- For cartridge drains, apply light misting to maintain odor-free performance without displacing sealant liquid.

Sustainability Profile

- Biodegradable & environmentally responsible
- VOC-compliant (CARB / OTC regulations)
- Phosphate-free
- Supports water conservation initiatives by enhancing performance of waterless urinal systems

Applications

- Commercial facilities
- Stadiums & arenas
- Airports & transportation hubs
- Schools & universities
- Office towers & retail centers
- Public drains & toilets

Available Formats

Quart spray bottles only – ready-to-use with trigger sprayer for janitorial teams

Precaution

Do not apply this product on surfaces that will come in contact with food or other consumable items.

Summary

Urinix™ is the eco-conscious, professional-grade odor defense designed to keep restrooms hygienic, odor-free, and long-lasting. By neutralizing malodor molecules at the chemical level—without surfactants, enzymes, or sealant-damaging ingredients—Urinix™ reduces maintenance costs, improves restroom experience, and supports sustainable facility operations.
